

## AMERICAN HEART ASSOCIATION - WEST VIRGINIA

Improving lives by: helping our local communities build healthier lives, free of cardiovascular diseases and stroke.

### AT A GLANCE

#### Our Support Includes

- Financial support to help fund AHA research and education initiatives
- Opportunities to participate with the company's annual Heart Walk team
- Employee engagement through collective fundraising efforts and events

### WHAT THEY ARE SAYING

"The American Heart Association relies so much on the support of our community partners and Greylock has been such an asset to our success. Not only does Greylock support our initiatives in the community, they really work to get their employees motivated to live a healthier, happier lifestyle! We are so grateful to have them as an advocate for the American Heart Association!"

**Michelle Loehr**

EXECUTIVE DIRECTOR | AHA-WV

### OVERVIEW

Greylock has a long and extensive relationship with the American Heart Association (AHA) and its fight against heart disease and stroke. Each year, the company sponsors the Charleston Heart Walk, supports AHA education efforts, and works throughout the year to raise funds to support the AHA's fight against heart disease and stroke.

### IMPROVING LIVES

#### Walking for a Cause

Greylock has been a sponsor of the AHA-Charleston Heart Walk for a number of years. And each year, Team Members get together to field a team to participate in the walk - being active, promoting healthy lifestyles, and supporting a great cause.

#### Having Fun and Raising Funds

Each year, Greylock hosts an employee fundraiser to collect donations to support the company's Heart Walk Team. From cornhole tournaments, to chili cookoffs and salsa competitions, our Team Members come together to have fun... and raise funds!

#### Seeing Red

Every February, Greylock participates in "Go Red Day", where Team Members wear red to increase awareness of how heart disease impacts women.

#### Supporting STEM

Greylock has partnered with AHA-WV to host "STEM Goes Red," a day-long event designed to inspire middle school girls to explore STEM outside the classroom while also learning how to take charge of their health and well-being through Go Red. Greylock women, including one of our talented female engineers, volunteered to help educate the participants about potential STEM careers in energy.
